Technical Skills

## ABOUT ME

Having recently graduated with a Bachelor's Degree in Information Technology, specializing in Digital Arts, I've actively balanced my studies with practical experience, such as fully immersing myself in my internship program and working part-time as a remote professional. This helped me learn the hardships and value of continuously extending knowledge and applying it in real world scenarios. It motivates me to look for a work environment, where I can comfortably dedicate my passion for technology and creativity, continuously learn and practice, and still fully enjoy in the process, while making valuable contributions and networks.
